May 2009 – April 2021

Nallasopara, Maharashtra

Projects

Car Rental System | *Java(OOP), Swing, AWS*

August 2024 – November 2024

- Developed a Car Rental System with functionalities like vehicle management, customer bookings, and automated invoices.
- Applied OOP concepts: abstraction (simplified processes), encapsulation (secured data) and polymorphism (flexible pricing methods).
- Utilized ArrayList for dynamic inventory management and implemented a GUI for user interaction.

MedStock-Medical Inventory Management | *HTML, CSS, JavaScript*

January 2024

- Enhanced data security and accountability by restricting inventory modifications to authorized personnel.
- Created an intuitive and user-friendly interface to reduce the learning curve and streamline inventory management workflows.
- Implemented features for real-time inventory tracking, low-stock alerts, and expiration monitoring to ensure uninterrupted supply of essential medical items.

Technical Skills & Soft Skills

Languages: Java, C, HTML/CSS, JavaScript, SQL

Libraries: Swing

Tools: AWS

Critical Thinking: I'm good at figuring things out and making sense of information.

Resilience: I can handle setbacks and keep going, even when things get tough.

Adaptability: I'm flexible and can easily adjust to new situations.

Teamwork: I work well with others and enjoy collaborating to achieve our goals.
